LinkedIn's Photo tool wants a square image!

Their square template is sized to the smallest dimension of your original photo image.

Make sure you're looking your best...

**Wide Image
Crops Left & Right**

Adjust Photo

Drag the yellow square to change position and size. [Change photo.](#)

Comments

Posting a photo is a very personal decision.

It can certainly help jog the memory of an acquaintance.
I admit that I remember faces better than names.

It might help you market toward your job-search goals.

In the past a photo has been key to a profile's strength rating. I, however, see that my profile is rated 'All-Star' and I have never posted a photo.

(Oh by the way) – How about a relaxed SMILE!
